Dept. of Environmental Quality

RECEIVED  
MAY 10 1979

Dear Mr. Bolton:

NORTHWEST REGION

We wish to keep you informed of pending enforcement action in your state. Pursuant to § 311(j) of the Federal Water Pollution Control Act [33 USCA § 1321(j)], regulations were promulgated (40 CFR Part 112) requiring non-transportation related onshore and offshore oil storage facilities which have a capacity in excess of 660 gallons above ground to prepare and implement a "Spill Prevention Control and Countermeasure Plan (SPCC)." Further regulations have been promulgated (40 CFR Part 114) providing for the assessment of civil penalties for the violation of those regulations.

The Enforcement Division of Region 10 has determined to issue a Notice of Violation of SPCC Plan Regulations to Owens-Corning Fiberglas Corporation, St. Helens, Oregon, with regard to its oil storage facility there. A copy of this notice is enclosed containing salient details of the violation.

The Notice of Violation proposes a significant civil penalty which may be mitigated in a settlement conference upon a showing of compliance with the regulations.

Mr. John A. Hamill [(206) 442-1275] will be pleased to respond to any questions you may have regarding this matter. We will continue to keep you informed on this and similar actions taken within your state.

Sincerely,

Lloyd A. Reed  
Director, Enforcement Division

Dear Sirs:

You are hereby informed that the enclosed Environmental Protection Agency Notice of Violation and Attachment No. X79-04-04-311(j) is herewith served on you. The violations involve EPA's Oil Spill Prevention Control and Countermeasure Plan regulations. A significant dollar civil penalty is proposed by the enclosed notice, but it may be mitigated in a settlement conference upon a showing of compliance with the regulations.

If you have any questions concerning this matter please contact Michael Garcia, the staff attorney assigned to the case, at the Legal Support Branch (206) 442-1275.

Sincerely,

Lloyd A. Reed  
Director, Enforcement Division

SUBJECT FUEL OIL CONTAINMENT - ST. HELENS

The project is the construction of an impermeable dyke (or berm) large enough to contain the two fuel oil tanks at our St. Helens Plant. This dyke is for two purposes: to prevent contamination of the Duwamish in the case of an accidental spill; and to contain for detection and remediation any small unnoticeable continuous leakage which would ordinarily pollute.

The tanks presently are located on ground subject to periodic inundation. To prevent intrusion of water, the top of the dyke is above the expected water level. The dyke will be of compacted impermeable material, and will be rip rap protected on the channelward side.

The work has been let and is expected to be finished in June. Two copies of the plan are included.

Seattle, Washington

IN THE MATTER OF: )  
Environmental Protection Agency, ) No. X79-04-04-311(j)  
Plaintiff, )  
vs. ) NOTICE OF VIOLATION  
Owens-Corning Fiberglas Corporation )  
Respondent. )

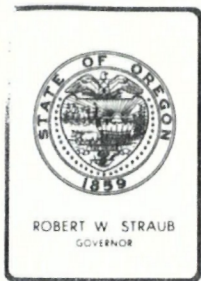

The United States Environmental Protection Agency to the  
Respondent(s) named hereinabove:

NOTICE IS GIVEN hereby that:

1. JURISDICTION

Respondent, above-named, within twelve months last, had at  
its oil storage facility, described in Attachment A hereto, an  
aggregate oil storage capacity in excess of the limits set  
forth in Title 40, Code of Federal Regulations, Section 112.1  
(d) and is subject to the requirements for preparation and im-  
plementation of Spill Prevention Control and Countermeasure  
Plans set forth in Title 40, Code of Federal Regulations, Sec-  
tion 112.3. Pursuant to Section 311(j) of the Federal Water  
Pollution Control Act Amendments of 1972 (hereinafter FWPCA)  
[33 USCA § 1321(j)] and Part 112 of Title 40 of the Code of  
Federal Regulations, the Environmental Protection Agency has  
jurisdiction to assess an appropriate civil penalty for viola-  
tions of the cited regulations.
